KARSEN HANSEN

24416 East Hawkstone Loop • Liberty Lake, WA 99019 • (954) 294-5473 • KarsenHansen@gmail.com | @ karsenh on GitHub

SUMMARY

Computer Science graduate from *Gonzaga University* possessing 3+ years of experience with OOP and leading and/or collaborating cross-functionally to successfully accomplish various development goals, excelling at communication, organization, leadership, and adaptability.

TECHNICAL SKILLS

JavaScript/JSX	Python	Node.js	Docker
TypeScript	Git/GitHub	Express.js	Heroku
HTML/CSS	SQL/NoSQL	MongoDB	RESTful APIs
FRUCATION			

EDUCATION

Gonzaga University Spokane, WA

Bachelor of Arts in Computer Science, minor in Economics (2021)

Academic Honors - Dean's List

PROJECTS

2021 • Senior Capstone Project – BOEING-360

- Built a full-stack (MERN) web application for BOEING consisting of a 360° navigable live stream, live map feed, and a
 dynamically populating list of interactive points of interest based on an airplane's current position and dynamic radius
- Built a video capture device capable of live streaming in 360x220 degree, 4K, high-dynamic range over secure LAN
 within a formatted navigable view, using NVIDIA's Jetson Nano (4GB) microcomputer along with a custom camera
 component
- Collaborated with a team of four within an Agile SCRUM environment by establishing work spaces, automating
 workflows using Kanban & custom bots, as well as organizing, clarifying, and delegating sprint deliverables reviewed
 by BOEING on a bi-weekly basis over a 20-week period

2021 • Research and Design - Comprehensive MERN Development

- Created a fully-fledged user authentication dashboard encompassing RESTful APIs, MongoDB, Express.js and Node.js
 to templatize a secure user authentication process using industry standard frameworks, libraries and APIs
- Used JSON web tokens (JWTs) along with sessions and cookies to create a custom user authentication process in Node, applying Twilio, NodeMailer, along with several other APIs for experience

EXPERIENCE

2013 – 2014 Vroom Grand Prairie, TX

Founding Member and Website Developer

- Served on the initial team of 12 at the e-commerce car retailer formerly known as AutoAmerica, with responsibility
 for developing the company's web presence including wireframing, primitive layouts, vehicle listings components,
 financing tools, and digital media using HTML, CSS, and JavaScript
- Independently liaised with retail and internet sales teams to streamline the sales process through the creation of information forms and validations; conducted customer service and de-escalations on an as needed basis
